PROGRAMME

The ESID Eastern Spring School is devoted to building up bridges between Western, Central and Eastern Europe, sharing professional experiences with experts and meeting other young immunologists from across Europe.

The scientific programme is divided into 5 sections. In each section 2 invited speakers will give a review lecture, covering a broad spectrum of immunodeficiencies as well as introducing some novel interesting diseases. This will then be followed by several presentations by junior participants with interactive discussion on the presented topic.

Apart from scientific programme you can look forward to rich and interesting social programme, such as a visit to a local brewery with tasting of various Czech craft beers. The meeting will finish with a closing dinner in the heart of Prague.
