ESID Summer School

26 to 30 September '07

Announcement!

The ESID Educational Working Party is delighted to announce that the *next 'ESID Summer School for Primary Immunodeficiencies' will take place from 26 to 30 September 2007 in Malaga, Southern Spain.* The Summer School is geared towards young doctors in training with a primary goal of education on the diagnosis, pathogenesis & treatment of primary immunodeficiencies. Feedback received from previous Summer Schools has been extremely positive; & individuals have found the course to be invaluable!

Faculty:-

We are very pleased that Helen Chapel (one of the instigators of the ESID Summer School programme) has also agreed to join the Faculty this year, as well as Steve Holland from NIH in the US who has given such stimulating presentations at recent ESID meetings. Other Members include: Andrew Cant, Anders Fasth, Esther de Vries, Teresa Espanol-Boren, Georg Holländer, Jacques van Dongen & Eleonora Gambineri (Junior Rep), so between us there should be an exciting programme designed to cover a wide range of leading edge educational topics such as: innate immunity, T cell disorders, CVID, immunoglobulin therapy & much more! The Summer School will be intense but we will also look forward to enjoying the beautiful sunshine in Malaga & going for a dip in the hotel swimming pool!

Location:-

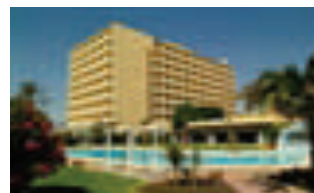

Malaga is the capital of the Costa del Sol, located on the coast & surrounded by mountains. It is one of Spain's largest cities & its international status rivals that of Madrid & Barcelona. It is also the birthplace of Picasso! The Hotel Tryp Guadalmar is in a quiet, idyllic setting but easily accessible from Malaga Airport. It offers a unique atmosphere with convenient facilities & excellent services.

How to Apply:-

For further details & to request an application form, please e-mail Andrew Cant at: Gale.Roberts@nuth.nhs.uk Information is also available on the ESID website: www.esid.org (Closing date for applications: 30 May '07)

Hope to hear from you! With best wishes,

Andrew J Cant
(Chairman of the ESID Educational Working Party)

Please help spread the word amongst your young colleagues, especially in the eastern European countries & also advertise in your country's immunology societies! Thanks.

We are very fortunate to have received support from the following companies:-

GRIFOLS **Baxter**

CSL Behring
Biotherapies for Life™

Talecris
BIOTHERAPEUTICS
